

## **Wheat Growth Stages**

### **Planting and Fertilizer Rates**

#### FEEKES GROWTH STAGES IN WINTER WHEAT

#### Planting Rate per jerib (good clean wheat seed)

28 kg /jerib

#### Fertilizer rate at Planting

DAP (18-46-0)      38 kg/jerib

**or**

UREA (46-0-0)      15 kg/jerib

#### Fertilizer rate in Spring

1st      UREA (46-0-0)      30 kg/jerib      growth stage-3      1st week March

2nd      UREA (46-0-0)      10 kg/jerib      growth stage-5 to 6      1st week April

Calender dates are rough estimate, use growth stage to determine fertilizer application

**Do Not over apply, this supplies all the crop can use, more fertilizer can damage crop and costs more money**
