Settlements																						
Fruit Trees																						
Vineyards																						
Gardens																						
Irrigated: Intensively Cultivated (2 Crops/year)																						
Irrigated: Intensively Cultivated (1 Crop/Year)																						
Irrigated: Intermittently Cultivated																						
Rainfed Crops (flat lying areas)																						
Rainfed Crops (sloping areas)																						
Pistachio Forest																						
Natural Forest (closed cover)																						
Natural Forest (open cover)																						
Degenerate Forest/High Shrubs																						
Rangeland (grassland/herbs/low shrubs)																						
Rock Outcrop / Bare Soil																						
Sand Covered Areas																						
Sand Dunes																						
Marshland Permanently inundated																						
Marshland Seasonal																						
Water Bodies																						
Permanent Snow																						

SOURCES:

1- This Land Cover Map is based on interpretation of Landsat Thematic Mapper (TM) satellite imagery of Afghanistan, acquired in 1990 (full coverage) and 1993 (partial coverage). The interpretation was assisted through the use of KFA -1000 space photographs of various regions of Afghanistan, acquired from 1988 through to 1992.

2- Topographic base used for this map is derived from National 1:100,000 scale topographic maps compiled by stereo photogrammetric method using aerial photographs acquired in the late 1950s. The projection of these topographic base maps is UTM, and the coverage of each map is 30 minutes of longitude by 20 minutes of latitude.

NOTE:

The boundaries and names on the maps do not imply official endorsement or acceptance by the United Nations.
