## Profile and Data

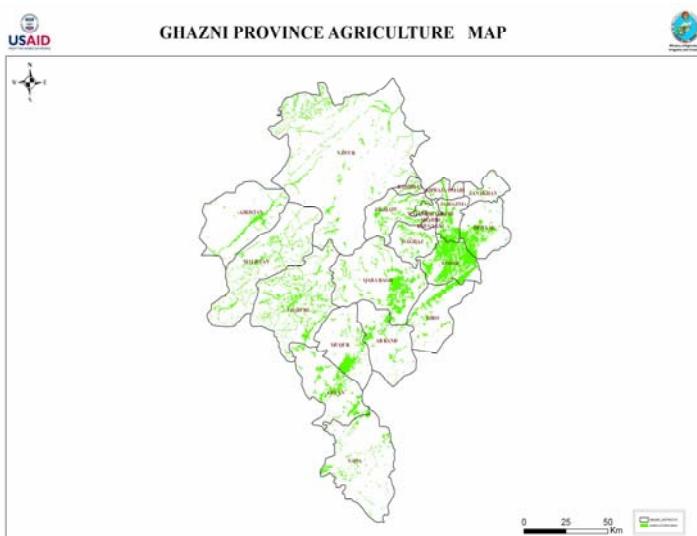

In Ghazni Province

### Ghazni Brief Introduction:

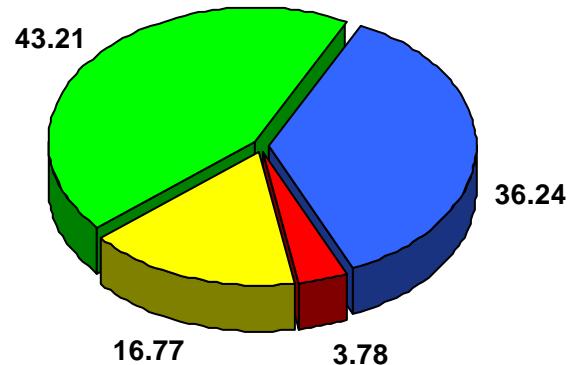

Ghazni province is located in central Afghanistan between 32.07-34.23 degrees latitude and 66.82-68.83 degrees longitude. Ghazni borders the provinces of Wardak and Bamyan to the north, Logar, Paktia and Paktika to the east, Zabul to the south and Urozgan and Daykundi to the west. Ghazni has a total of 3,109 villages and an estimated population of 1,080,843 people based on 2003 census data. The province has 19 districts that encompass 22,461 square kilometers, including 361,891 hectares of agricultural land. Ghazni is famous for producing grapes, apricots and bukhara plums and most residents living in Ghazni's northern and southern districts raise sheep and goats. The districts of Ghazni are as follows:

- |             |              |                |               |
|-------------|--------------|----------------|---------------|
| 1. Ab-Band  | 6. Maqr      | 11. Khojaomari | 16. Rashedan  |
| 2. Ajrestan | 7. Malistan  | 12. Gelan      | 17. Waghaz    |
| 3. Ander    | 8. Jaghatoo  | 13. Gero       | 18. G. Center |
| 4. Dehyak   | 9. Jaghori   | 14. Nawa       | 19. Zanakhan  |
| 5. Oarabagh | 10. Khogiani | 15. Nawar      |               |

In 2008 Ghazni farmers cultivated 27 agricultural products on approximately 235,652 hectares of land (16.7 percent of total area). The province's cultivated area is most concentrated in the southern and eastern districts (see map on the left) because of the vicinity to the Ghazni River and the Sarde Dam. Fifty-two percent of this agricultural land is located in 9 of the province's 19 districts. The terrain of the remaining 10 districts is most suitable for raising livestock and collecting forage.

The total 2008 crop production surveyed in Ghazni province was approximately 1,034,942 metric tons (MT), mostly consisting of fruits (43.21 percent), followed by vegetables (36.24 percent), grain (16.77 percent) and industrial and fodder crops (3.48 percent). The total market value of 2008's harvest was estimated at \$456.96 million, with no contributing value added processes.

Qarabagh and Ghazni Center districts led the province in terms of agricultural output, producing 26.03 percent and 17.57 percent of 2008's total production, respectively. Ab band, Ander, Maqr, Ajrestan, Khoja Omry and Jaghori districts took a combined second place by producing 38.49 percent of total production and the remaining 11 districts contributed 17.9 percent of Ghazni's agricultural products in 2008.

### Research Methodology

This report was prepared based on information provided by AgNet/NAIS system. In 2007 and 2008 AgNet Conducted two separate surveys (1) district profile survey and (2) agricultural statistic survey in 19 provinces of Afghanistan with the support of ASAP and MAIL at district level. During a period of 4 months each, more than 50 surveyors collected information related to the number of hectares land cultivated types of products produced number of livestock, crop calendar, sources of water and much more agricultural information. The information presented in this report is based exclusively in the area surveyed, not in the total farm land of the provinces. The AgNet/NAIS data base for Ghazni is the most accurate database available in the country in spite there is not estimation regarding the level of exactitude of the information. All data related to harvest amounts was checked in July 2008 by ASAP personnel Prof. A. Ghani Taj Agricultural Information Specialist and former professor of Kabul University and Ahmad Jawid Abid Survey and Data Assistant) by comparing the national average productivity level of each products. Crop value information was determined on wholesale price in Ghazni and collected by Ghazni AgNet officer Mr. Ah.Jawid and approved by deputy director of Ghazni Provincial Agriculture department Mr. Sultan Hussain in September 2008.

## Grains

Annual grain production surveyed in 2008 was approximately 173,613 MT and was worth \$103 million. Wheat made up almost 88.27 percent of all grains grown in the province and generated income in the amount of \$95 million in 2008. The remaining 11.7 percent consisted of other grain crops that had a market value of \$8.7 million.

Grain	Tons	Value USD \$
Wheat	153,264	95,023,562
Barely	18,446	7,009,374
Maize	157	47,049

With the exception of Nawah district, wheat is grown in all 19 districts of the province. Ab band and Ajrestan districts produced 62 percent of all wheat in 2008. Barley was the second most cultivated grain (10.6 percent) and Ab band and Gelan districts together produced 83.33 percent of all barley in the province during 2008.

## Fruits

Annual fruit production surveyed in Ghazni province was estimated at 447,156 MT and generated almost \$166 million in revenue. Grapes represented 42.5 percent of the province's fruits and resulted profits in the amount of \$13.3 million. Apples were the second and apricots were the third highest valued fruits (24.6 percent and 8.4 percent, respectively). Almonds, as the sixth most produced fruit in Ghazni, generated the most revenue of all fruits sold in 2008 (\$60,845,280).

Fruit	Tons	Value USD\$
Grape	190,245	13,310,159
Apple	110,133	44,053,079

Other Fruit	739	738,600
<b>Total</b>	<b>447,156</b>	<b>165,914,340</b>

Grapes, apples, almonds, plums and apricots are grown in most of the Ghazni's districts. Ghazni Center was the only district where sour cherry was grown and farmers in this district also produced the highest volumes of grapes, apples, plums and apricots in the province. Ghazni Center and Jaghori district produced high volumes of all major fruits (61 percent and 12.8 percent respectively) among all the districts of the province in 2008.

Other Vegetable	910	819,115
<b>Grand Total</b>	<b>375,041</b>	<b>68,660,345</b>

Vegetable production surveyed in Ghazni province during 2008 is estimated at 375,041 MT, which had a market value of \$68.66 million. Ghazni farmers produced more than 11 different types of vegetables in the 19 reported districts with only Zanakhan district not producing any significant amount of vegetables in 2008. Qarabagh district produced the highest the amount of potatoes (63 percent) and onions (84 percent) in 2008. Potatoes and onions represented almost all (96.64 percent) of all vegetables in Ghazni.

## Fodder & Industrial Crops

Ghazni is located at the Central South zone of Afghanistan. Ghazni is mostly irrigated by Karizes (traditional underground water system), Ghazni River and the Sarde Dam. Potatoes are an important vegetable and apples, grapes, Bukhara plums and almonds are important fruits that are used for local and commercial benefit in Ghazni. Alfalfa and clover are good cash crops and sources of fodder for livestock, both of which generated a combined \$7.8 million in 2008.

<b>Fodder and Industrial</b>	<b>Tons</b>	<b>Value USD \$</b>
Alfalfa	22,664	\$ 4,532,720
Clover	16,468	\$ 3,293,660
<b>Grand Total</b>	<b>39,132</b>	<b>\$ 7,826,380</b>

Ghazni farmers grow alfalfa and clover in 10 of the province's 19 districts. Sesame and other industrial crops were grown in very small amounts almost exclusively for household consumption in 2008.

	<b>Alfalfa</b>	<b>Clover</b>
Khoja Omary	648,000	431,800

## Livestock

Based on the 2008 statistical survey, farmers and herders raise 8 types of household livestock and poultry in the province (See annex –V).

Household livestock maintained in Ghazni amounted to 1,200,788, not including 528,543 chickens, ducks and turkeys. Villagers of Qarabagh, Nawa and Malistan districts raised 63.75 percent of all livestock, while 23.48 percent of the province's poultry was found in Gellan and Nawa districts in 2008. Sheep are the most dominant household livestock found in Ghazni province (70.35 percent).

Province	District	Total livestock	Total Poultry
Ghazni	Ghazni cent	23,629	42,740
	Ab band	45,660	43,100

Animals	Cow	Sheep	Goat	Donkey	Horse	Total	Chicken	Turkey	Ducks	Total
Heads	107,860	844,840	182,878	62,852	2358	1,200,788	525,148	205	3190	528,543
Percentage	8.99%	70.35%	15.23%	5.23%	0.20%	100%	99.36%	0.04%	0.60%	100%

Cattle in Ghazni include oxen and dairy cows. The number of donkeys is a good indicator for the development of transportation. Ghazni is famous for keeping healthy and strong donkeys. Sheep and goats make up 85.5 percent of all livestock and indicates the presence of nomad (Kuchi) tribes and good pasture land in the area.
