The boundaries, names, and designations used on this map do not imply official endorsement or acceptance by iMMAP or USAID/OFDA. All information is the best available at the time this map was produced.

iMMAP is funded by the United States Agency for International Development (USAID)/Office of U.S.

Foreign Disaster Assistance (OFDA)

Flood data: NATO (Hagen, et al. 2010). Rivers: USGS Afghanistan Project, Digital Elevation Model (DEM), Slope, USGS, Administrative boundaries: AINS, Lakes, Drainage, Basins, FAO & Environmental System Research Institute (ESRI) Flood Hazard created with hydraulic modeling from High Resolution Digital Elevation Model (DEM) data by NATO C3 Agency. Layer shows potential inundation extent. Reference: Emlyn Hagen, NC3A (2008). Afghanistan Flood Hazard. The Flood Number: 2008. Afghanistan Flood Hazard. Geo-Team, and Control Agency (NC3A). Geo-Team. Slope flow and limitations of the data are described below. A degree of error is inherent in all maps, especially modeled maps and maps of dynamics events such as floods. Accordingly, the maps are distributed AS-IS without warranties of any kind, either express or implied. NC3A shall not accept any liability or warranties for damages incurred from the use of these maps, including but not limited to warranties of suitability to a particular purpose or use. No attempt has been made in either the design or production of the maps to define the limits or jurisdiction of any federal, state, or local government. The map is intended for use only at the published scale.
