

# **Plenary Session 1**

**What kind of trees do we  
want and where would  
we like them?**

Mr. Ghoyur

A photograph of a dense forest. In the foreground, there's a mix of green grass and fallen brown leaves. A path or clearing leads into the middle ground where many tall, thin evergreen trees stand in a grid-like pattern. The background is filled with more of these trees, creating a sense of depth and density.

# Making Reforestation More Effective

- We are here to share experiences and develop new ideas.
- Nothing is perfect so we need to discuss both the good and not so good aspects of promoting reforestation.
- We want to learn from each other.

# Reforestation Occurs in Many Different Areas

- Home compounds
- Public Green Areas
- Marginal Lands

# Different tree and shrub species are appropriate for different areas

- Upland hills and mountains
- Along streams and rivers
- Near lakes
- Around agricultural areas

# The purpose of the reforestation should be considered

- Environmental Improvements
- Aesthetic and standard of living improvements
- Erosion reduction and soil conservations
- Harvest of material
- Protection (wind and cold breaks)

A photograph of a dense forest. In the foreground, there are several tall, thin evergreen trees standing upright. Behind them, the forest continues with more trees, creating a thick canopy. The sky is visible through the branches.

# **Working Groups**

- 1. Why Plant? Incentives for planting and care of trees**
- 2. Where to plant trees and who will plant them?**
- 3. Private Sources of planting stock**
- 4. Public Sources of planting stock**

# Work Group 1: Incentives

- Incentives for planting
- Incentives for maintenance and care

## **Work Group 2: Where to plant trees and who will plant them**

- Private land
- Public land
- Volunteers
- Paid employees

# **Work Group 3: Private sources of planting stock**

- Who
- Where
- Experiences

# Work Group 4: Public sources of planting stock

- Who
- Where
- Experiences

A photograph of a forest scene. In the foreground, there is a mix of green grass and fallen brown leaves. A path or clearing leads into the background where a dense stand of tall, thin evergreen trees, likely pine or cedar, is visible. The sky above the trees is bright and overexposed.

# For Each Workgroup

- Name of group
- Name of work group participants and organization that they represent
- Issues discussed
- Ideas that can be used to make reforestation more effective
