

e-Afghan Ag RS App

What is e-Afghan Ag?

The e-Afghan Ag is a growing, publically accessible, on-line information resource that improves Agricultural development in Afghanistan.

What is e-Afghan Ag RS App?

The e-Afghan Ag RS App is a set of Remote Solution Applications (RS App) that provide the ability to download, reference and present information from the e-Afghan Ag project.

What information can I find in the e-Afghan Ag RS App?

The e-Afghan RS App provides a key subset of information from the e-Afghan Ag website:

- **Provinces:** Priority needs and opportunities.
- **Technical information:** Fruits, nuts and vegetables; grain and other field crops; livestock; forestry and watershed management; irrigation.
- **Non-technical information:** Cultural and logistical information..

On what types of devices is the e-Afghan Ag RS App information available?

The e-Afghan Ag RS App information is viewable on any device that will display PDF files. This includes:

- **PCs and Mac:** All RS App information is easily downloaded and viewed on any PC or Mac. Updates are available over wired or wireless internet for PC and Mac via many methods.
- **iPad:** Using a wireless network and a PDF reader application, the iPad can display RS App information. An important note is that information is only downloadable over a wireless network.
- **iPhone and iPod Touch:** While the PDF information is available, it may be hard to read.
- **Android devices:** The PDF files can be viewed on a Kindle via downloading the files to your PC or Mac and then transferring to the Kindle. Note that Black and White display may make viewing PDF files that use color quite difficult, therefore Kindle fire would work best. Other android devices soon to be evaluated, but most content should be viewable.
- **Other device types:** Any device that can download and display PDF files should be able to display most of the RS App information.

What other documentation is available?

Installation guide for downloading RS App Information with an iPad

Information Sheets (IS) with key and advanced information for retrieving RS App information on PC/Mac
Information Sheet (IS) for a One-Click Download Script for PC

Should I register if I am using RS App information?

There is no need to register, but if you wish to be apprised of advances, please send an email to support@eafghanag.org with your name and any other pertinent information.

The screenshot shows the header of the e-Afghan Ag website. At the top left is a logo with four small images: a sunflower, a bird, a hand holding a plant, and a bunch of tomatoes. To the right of the logo is the text "e-Afghan Ag RS App". The main header features the "UCDAVIS" logo with "COLLEGE OF AGRICULTURAL & ENVIRONMENTAL SCIENCES" underneath. Below the header is a banner with the text "Afghan Agriculture". Underneath the banner is a navigation menu with three items: "Home", "Fruits, Nuts and Vegetables", and "Grains and other Field Cr".
